Our mission is to create furniture that unites elegance, functionality and the latest trends with a unique sense of market needs. The highest quality is what we want to offer to our growing group of customers around the world. **The company is constantly improving its operations so that furniture signed with the POSO CASA logo is created in accordance with the tastes of users.**

All of our projects are created on an individual commission. The designs presented in this lookbook are examples of our designer's vision, which we can bring to life. However, we always strive to meet the objectives of each project and offer solutions that are fully aesthetically and functionally suitable for the client.

Each sofa, armchair and bed can be upholstered in any fabric or leather from our wide catalog of materials.

Our customers can choose from smooth fabrics, textured fabrics, patterned fabrics and various types of natural leather. We always present samples and variants in a customized package for each project to better personalize the commission.

We also offer high-quality mattresses that are perfectly matched to the bed frames we manufacture.
